A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-3 and 7-10 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 2, 4 and 6-10 of copending Application No. 09/857,865. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Mark et al.

Mark et al disclose polycarbonate compositions comprising organophosphorous compounds meeting the limitations of applicants formulae 1 and 2 (see columns 1 and 2). The further incorporation of common adjuvants is disclosed at column 4, lines 59-63 which adjuvants are seen as meeting the instant limitation to anti-drip agents. These compositions are further taught as suitable for the formation of electronic parts.

Claims ~~4-6~~ are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
